

PT. SENTRUM
SARANA
INDUSTRI

COMPANY PROFILE

PT. Sentrum Sarana Industri is a leader in industrial chemical packaging in Indonesia. We are committed to supporting the packaging industry by providing high-quality products and the best service. With extensive experience and a strong reputation, PT. Sentrum Sarana Industri is dedicated to becoming a strategic partner for customers in achieving their expected business goals.

Visi & Misi

1 Visi

To become a leading market player in the Indonesian adhesive and packaging industries by providing high-quality products, timely delivery, excellent service, and creating value for our customers.

2 Misi

To provide exceptional customer service by delivering value to consumer products, improving product quality, increasing production output, offering advice on machine implementation and use, and building strong partnerships and collaborations with customers.

Quality & Assurance

Quality

Our professional team possesses the skills and knowledge, combined with quality control tools, to ensure and maintain the quality of our products. We also collaborate with accredited laboratories to test our product results before they are released to the market.

Development

Our product development is not limited to formulation but also encompasses application and technology. We have R&D equipment, including process reactors, distillation, extraction, fermentation, drying ovens, and freeze drying. Our team consists of people who are experienced in the paper and corrugated cardboard box industry.

Facilities

Our facilities are established in an industrial area with integrated facilities between departments to achieve added value and mutual support, ultimately providing premium products and services for our customers.

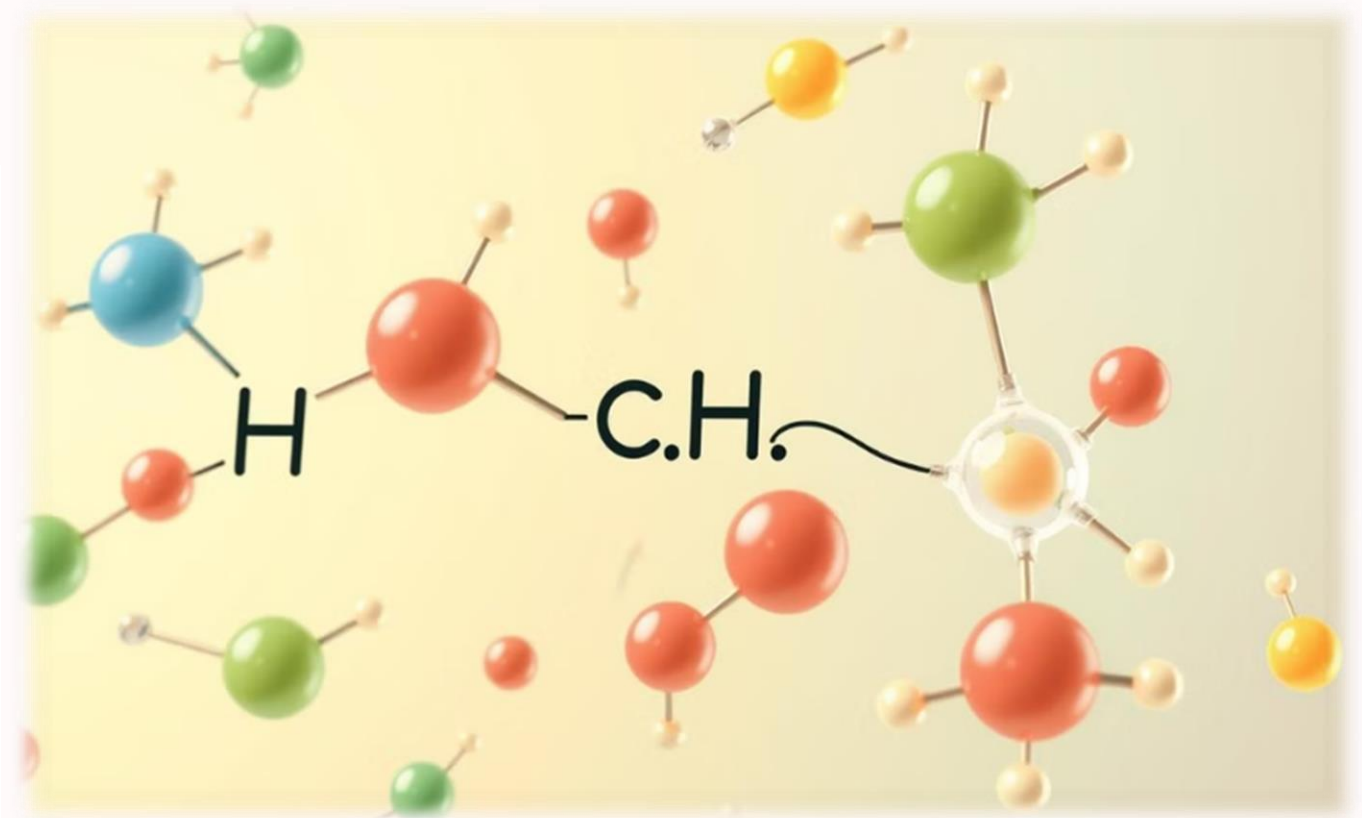

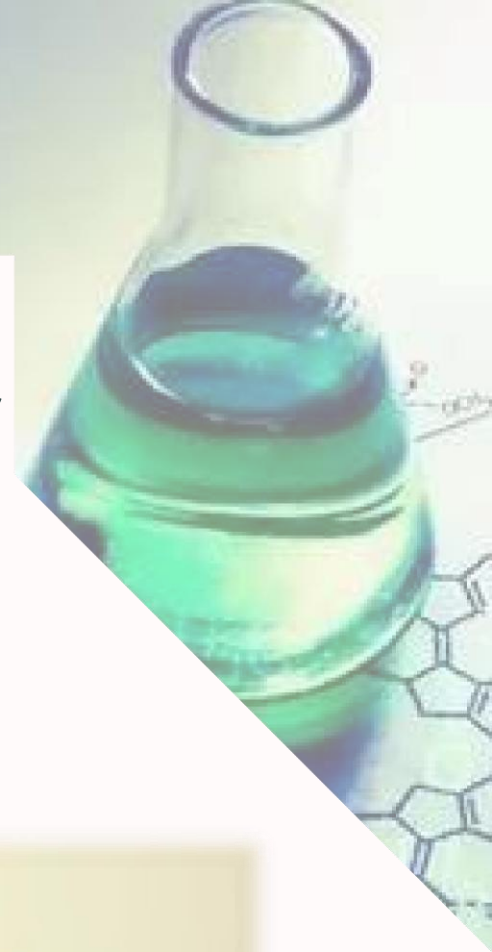

Produk

Our core products are formulated for the corrugated and carton box industry. The selection of raw materials and machinery is key to the success of corrugated and carton box products.

We provide additives to enhance product capacity, improve carton box quality, increase work efficiency, and reduce production costs. We collaborate with customers and build commitment to achieve this.

Specialty Additives

High Bonding Strength

Our additives offer exceptional bonding strength, ensuring secure and durable packaging solutions.

Ease of Use

Our additives are designed for user-friendliness, making them easy to incorporate into existing production processes.

Effective Assembly

Our additives facilitate efficient and reliable assembly of packaging components, streamlining production and minimizing waste.
